

# Dark Sky Lodging/Campsite Nomination Form

Read note at bottom! Complete and return to Stella@darkskyarkansas.com

Your Name (required)

Your Email (required)

Phone Number (required)

Choose between the **GROUP FACILITY** and **INDIVIDUAL UNIT(S)** depending on which one best fits your operation.

**GROUP FACILITY** - Fill this field out ONLY where a group of clustered units are located within a few miles of one another, are marketed on a central website and guests come to a central office location to obtain access. Provide the name of the business followed by any website address and the geographical location of the office facility. Location can be provided by postal address, or Latitude/ Longitude. (example: XYZ' s Co. cabins, www.dark-skyCabins.org , 450 AR. Hyw. 35, Dark-Sky AR.) (Lat/Long is displayed on GPS devices, most smart phones, or google earth.)

**INDIVIDUAL UNIT(S)**- Fill this field out where ONE OR MORE units (such as cabins) with common ownership or management are not operated as a single facility, or are in substantially different locals. Provide a name or ID number, geographical location, and if different, website address for each unit, placing a semicolon between the information related to each unit. (unit 1, Web Link, location; unit2, web link, location; etc.) Location can be provided by postal address, or Latitude/ Longitude. (Lat/Long is displayed on GPS devices, most smart phones or can be obtained from google earth.)

EXTERIOR LIGHTING - IF you have determined that each facility/unit complies with the Responsible Lighting Requirements enter "compliant". If you are uncertain type "lets talk". Somethings can be grandfathered in with a plan.

OBSERVING SITE(s) - All listed units must have a nearby open area where most of the night sky can be seen. If the unit offers this, just say "onsite". If relying upon a nearby location, such as a public park, overlook or campground already listed on Stella' s Observing Site Map, please identify it by the name given on the map and describe guest access (walking, driving, ~time and distance). Do this for each unit if there are multiple units and their observing sites differ or access to a common site is materially different due to the units being in materially different locals. For example, cabin #3 might list "onsite", while cabin#5 might list a public campground. You might list several potential observing sites if available. If a new site(s) is involved, one not on Stella' s Observing Site Map, name it and fill out the seperate form for adding observing sites to stella' s Observing Site Map. If this seem complicate enter "help" and we will contact you.

Provide three or four sentences that you would suggest to be used in an introductory post that describe your facilities/units services, opportunities or other virtues. Also, note if binoculars and/or any sky guides are provided.

**I have reviewed the requirements to be listed on Stella' s Host Map and believe the listed units qualify, and agree to maintain Stella' s in room literature on display along with any maps or directions needed to direct guest to any remote observing sites listed above. <http://darkskyarkansas.com/stella-qualify/>**

I have reviewed and agree to the terms of service. <http://darkskyarkansas.com/host-site-forms/>

If text does not enter when typing, download and used AdobeReader to complete and save, or simply send a document with the requested information. If you have question please email us at [Stella@darkskyarkansas](mailto:Stella@darkskyarkansas) and we will get back to you.

Don' t forget to like or follow [www.facebook.com/darkskyarkansas.org/](http://www.facebook.com/darkskyarkansas.org/) and from there join the Facebook group page where you can make a post about your host business and recommend it. Thanks
